

Rebranding Bronswerk Heat Transfer Services BV

Vierpolders, 22 December 2020 –Evert Poss and Jan Wallet, partners in P&W Management BV, would like to announce the acquisition of a hundred percent interest in Bronswerk Heat Transfer Services BV as of December 2020.

P&W Management BV already had a minority interest in Bronswerk Heat Transfer Services BV since 2019 by acquiring 40 percent of the shares. In December 2020, the remaining 60 percent of the shares were also purchased. Part of the transition is the fact that the company name will officially be changed as of February 1, 2021.

“After our initial minority interest and the subsequent growth of the company of the past two years, the time was right for us to step in and acquire the remaining 60 percent”, Evert Poss and Jan Wallet stated. “We are very much looking forward to maintain all our business and to boost our sustainable ideas of added value to the new energy market in these coming months and from 2021 on. Of course, all of our current clients can continue to count on the service and dedication they have come to expect from us.”

New direction

Bronswerk Heat Transfer Services B.V. is a young and dynamic organization. Building on a rich history in industrial maintenance of heat exchangers, air-cooled coolers and condensers, the company is fully committed to service, maintenance and optimization solutions for existing facilities. Now that the financial link with former parent company Bronswerk Heat Transfer has been severed, the company will also focus on the **new equipment market**.

"Our motto 'Excellence in maintenance doesn't cost money, but yields it' will therefore be modified to 'Excellence in maintenance **& new equipment** doesn't cost money, but yields it'."

The workforce and production facilities will also be further expanded. The **newly constructed headquarters** in Vierpolders will be completed in the autumn of 2021, complementing the current HQ as well as the Sales & Engineering Centre in Nijkerk and the Branch office in Elsloo. As of February 1, 2021, Bronswerk Heat Transfer Services BV will continue under a **fresh new company name** (to be unveiled at a later date) that will represent the company values – such as sustainability, safety, reliability & integrity – that we hold dear.

About Bronswerk Heat Transfer Services BV
